Control Room

Response Team

Improved Mission Outcomes

- › Fast delivery of critical images to response teams
- › Significantly increases chance of a positive identification
- › Eliminates errors caused by ambiguous, unclear verbal descriptions
- › Images can be sent to existing radio talk groups or individuals

Increased Efficiency

- › Uses images from any networked source (CCTV, Smartphone, social media, PC files)
- › Frees up vital dispatcher resource by eliminating need for lengthy verbal calls
- › Reduces network loading by using a single TETRA transmission to send to all talk group members
- › Images can be stored on the receiving radio for future reference

Simple Deployment and Use

- › Simple software installation
- › Quick set up using your existing talk group structure
- › Access the Secure User Interface via any web browser
- › Select image, crop and add text
- › Select recipients
- › Send

Going further in critical communications

sepura.com/applications

OVERVIEW

Sepura's IMAGE DISPATCHER is a software application that allows a dispatcher to select and crop an image from a variety of sources (including live feed from a CCTV camera), add a text message and send it to users of compatible TETRA radios.

SOFTWARE APPLICATION

The application runs on a central server and has a web UI that allows simple operation from a networked web browser. The application can also be installed inside an intranet and can be used without internet access.

COMPATIBLE DEVICES

The following radios can receive picture messages from Sepura's IMAGE DISPATCHER

- Sepura SC, STP and SRH Series TETRA Hand Portable Radios
- Sepura SCG22 and SRG3900 TETRA Mobile Radios

IMAGE SOURCES AND USE CASES

Images captured by CCTV, video recorders, cameras or retrieved from computer files can be quickly and simply edited and dispatched with an accompanying message from control rooms.

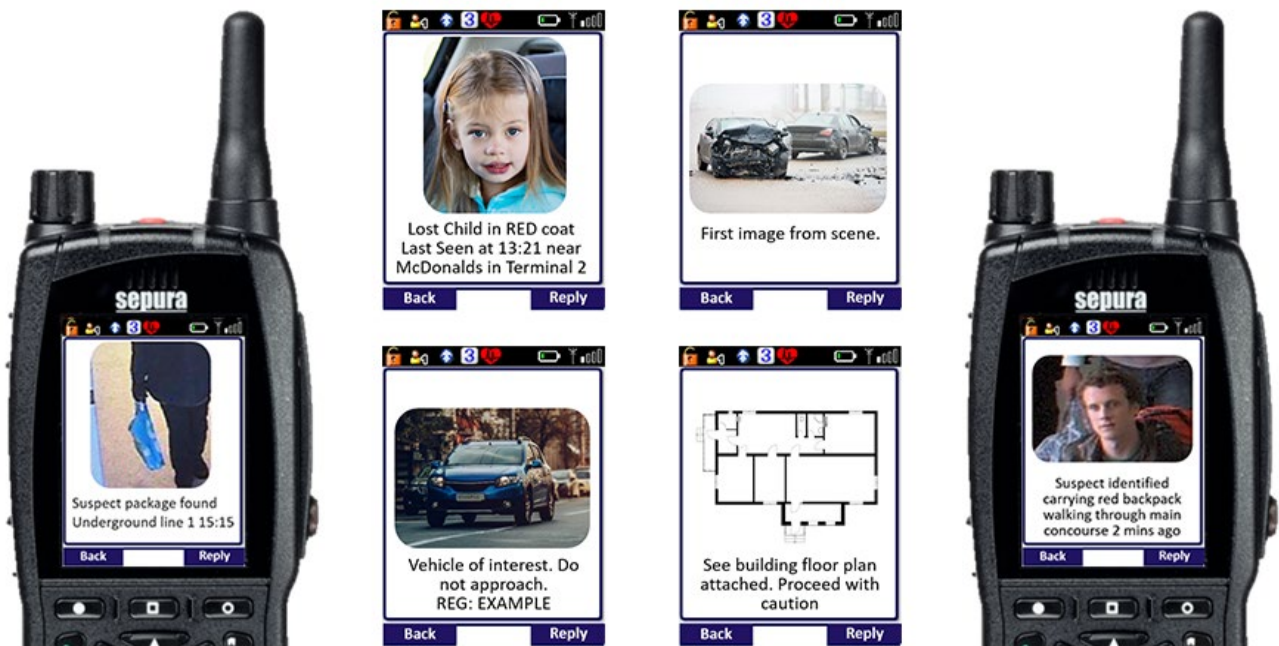

IMAGE DISPATCHER can improve mission outcomes and efficiency for a wide variety of organisations

- › Police
- › Ambulance
- › Airports
- › Prisons
- › Hospitals
- › Factories and offices
- › Industrial sites and processing plants
- › Arenas and stadiums
- › Museums
- › Shopping centres
- › Hotels
- › Wind farms
- › Utilities
