NO-COMPROMISE USABILITY
Many small hand-helds use smaller screens and keypads, limiting real-world usability. The SC21 has a 2.4” high resolution QVGA screen – the largest on any TETRA hand-portable – allowing for quick and easy viewing in all light conditions, including direct sunlight. Night mode reduces glare in low light, and the large screen area is ideal for data-rich apps usage.

Well-spaced keys make data entry swift and accurate and the intuitive user interface is compatible with the SC20/STP range, making it easy to pick up and use with minimal training. The shortcut and notification bar gives instant access to five favourite features, indicates missed calls or messages, and alerts the user to any changed states, such as speaker mute or transmit inhibit.

Custom-definable SmartMenus give users swift and immediate access to frequent features, short data applications and the forthcoming Sepura SmartApps.

NO-COMPROMISE SMART CONNECTIVITY
Today’s TETRA handsets are the central hub of connected body-worn devices, from barcode readers and RFID scanners to smartphones, smart watches and tablets. The SC21 offers both Bluetooth and Wi-Fi connectivity, allowing fast access to data for business and mission critical applications.

NO-COMPROMISE SECURITY
Designed for mission critical use, the SC21 supports all levels of cryptographic protection inherited from the SC2 and STP series.

LOWER COST OF OWNERSHIP
100% compatibility with STP RAC-based and SC20 sRAC-based accessories – along with common battery solutions – allows for significant re-use of existing investments and minimises capital expenditure.
Small and light enough to be lapel-worn, the SC21 is a next-generation, smart TETRA hand-held radio, and the latest addition to the SC2 Series.

With a wide range of functionality inherited from the ground-breaking SC20 hand-portable – yet 25% smaller – it offers all the benefits of a compact radio, with no compromise on performance.

NO-COMPROMISE RF PERFORMANCE
With a best-in-class TETRA engine, the SC21 allows you to keep communicating where other small handsets fail.

Class 3 high-power RF transmission, coupled with exceptional receive sensitivity, gives the SC21 extended operational range, stretching coverage into areas where it was not possible before.

NO-COMPROMISE COMMUNICATION
The SC21's best-in-class audio capability allows for rich, clear voice communication, however noisy the environment. The powerful, directional speaker projects audio to the user's ear, providing extra clarity, and unique Water Porting technology ensures that clarity is maintained, even in continuous, heavy rain.

NO-COMPROMISE WORKER SAFETY
The SC21's advanced worker safety features offer peace of mind for lone or remote workers at all times of day or night.

From automated Man-Down and Lone Worker protection, to biometric user health monitoring, location tracking and a dedicated emergency button, in the event of a crisis, help is never far away.
