

AppSPACE

Public Safety Radio Apps

For improved operational safety, efficiency and effectiveness.

Radio & User Log On

Associates Radio & User ID

- Efficient asset management
- Simplify pool radio management
- Allow/deny user-specific privileges
- See which users are active

Radio Low Battery Alerter

Never lose radio comms

- Radio emits loud audible alert and shows visual warning once battery reserve level has been reached
- Alert escalation option

Smart Equipment Monitor

Ensure team safety at all times

- Connects to smart devices to share critical data & alerts
- Alerts triggered by body temperature, vital signs (e.g. heart rate), SCBA Air pressure, gas sensors etc
- Alert escalation option

Failed Call Reporter

Automatically reports a failed call

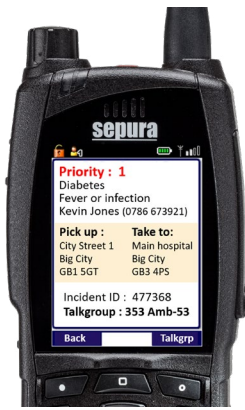

- Reports include time, location & cause of a failed call
- Reports viewable by web-browser in real time
- Builds confidence in your network performance
- Identifies network dead spots & training needs

Indoor Location App

Track location when GPS is unavailable

- Used with LE Bluetooth beacons & WiFi hotspots
- Compatible with 3rd party or Sepura mapping applications
- Enhances efficiency of incident & task dispatch
- Improves safety of lone workers

Smart SDS Alerter

Improves response speed

- Enhances standard SDS messages used for task dispatch
- Improves communication with rich text, formatting & audio tones
- Saves time by automating manual actions

Vehicle Crash Alerter

Allows control if an agency vehicle is involved in a collision

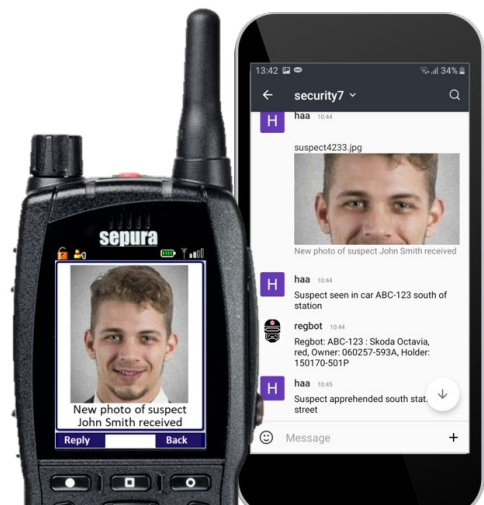

- Allows fastest possible deployment of assistance
- App detects crash via airbag (or tilt) sensors and automatically send SDS alert to control
- SDS alert includes vehicle ID, GPS location and time of incident

Route Test Network Monitor Maps your radios TETRA coverage on a Smartphone

- Allows you to test and record coverage along a route
- Records can be saved and exported for detailed analysis
- Aids operation planning and network fault finding

Sepura Smart Chat Secure Smartphone messaging for Public Safety

- Productive messaging across operational teams
- Self hosted and secure without reliance on commercial clouds
- Flexible integration to IT systems and data sources
- Forward critical chat to TETRA radios

Tailored applications are also available on a project basis to suit your requirements.
