

Cleaning Hand Portable and Mobile Radios

Sepura Public
MOD-20-2374 Issue 1

To minimise the risk of cross infection and to keep radios in good working order we recommend regular cleaning and sanitising of radios.

To clean a Sepura hand-portable or mobile radio:

- A soft brush can be used to remove visible debris and stubborn contaminants.
- Use a damp cloth soaked with a diluted mild detergent to clean the external surfaces. Do NOT use chemical aerosol or abrasive cleaners.
- Radios that are IP67 rated, such as the SC20, SC21, STP9000 and the intrinsically safe STP8X Series, can be rinsed under gently running water with a mild detergent. The battery and antenna MUST be fitted to the radio before rinsing under running water.
- Shake the radio to remove excess water from behind the keypad before drying.
- Dry the radio with a clean lint free cloth.
- Allow the radio to dry before operating.

To sanitise a Sepura hand-portable or mobile radio:

- To sanitise the radio using Clinell® universal sanitising wipes or equivalent.
- A cloth moistened with 70% Iso-propyl alcohol (IPA) solution can be used clean the SC20 or SC21 models.
- Allow the radio to dry before operating.

Notes:

Warning! PERSONAL SAFETY. Always obey your local health and safety procedures when using potentially harmful cleaning solutions. Appropriate Personal Protective Equipment (PPE) should be worn when cleaning the radio. If your radio has been subject to contamination, seek advice from your local Health and Safety Authority.

Caution! Do not dry the radio using a microwave oven or with any other heating device. Always follow the instructions and guidance of the cleaning product manufacturer when using chemical cleaning products.

Caution! Always read the instructions for using the sanitising product carefully and obey all safety instructions relating to use. Regular use of this sanitising product may degrade the hard coat protection of the radio keypad.

For full details on caring for your Sepura radio contact your local Sepura sales representative or supplying Partner, details of which are available at www.sepura.com
